Software engineer building **full-stack applications** and **AI agents.** Built and deployed systems involving **secure code execution, GitHub automation, real-time communication, payments, and cloud infrastructure**.

SKILLS

AI Engineering: Agent Workflows, LangGraph, LangChain, RAG, Tool Calling, LLM API Integration, Prompt Engineering, AI Observability
Languages: Python, TypeScript, JavaScript, C++
Backend & Integrations: Node.js, Express.js, FastAPI, Pydantic, REST APIs, GitHub Apps, OAuth 2.0, JWT, E2B, WebSockets, Socket.io, RabbitMQ, Redis, Fastify, Supabase Auth, Razorpay Payment Gateway
Frontend Technologies: React.js, Next.js, React Native, Tailwind CSS, Framer Motion
Databases: MongoDB, PostgreSQL, Drizzle ORM, Prisma
Cloud & DevOps: Docker, AWS EC2, AWS S3, Cloudflare R2, Nginx
Observability: PostHog

PROJECTS

Nimbus: Cloud Development Agent

- **Built a cloud development agent** that connects to GitHub repositories, understands codebase context, researches the web, and turns natural-language tasks into **verified software changes**.
- **Implemented sandboxed execution** for file inspection, code changes, command execution, artifact generation, Mermaid diagrams, and validation in an **isolated environment**.
- **Automated the GitHub workflow** with pause-and-resume sessions and PR creation, updates, merges, and closures, reducing the manual steps from **task to pull request**.

Sargosh: AI Dictation App for Windows

- **Built a Windows dictation app** using Electron, React, and TypeScript, with custom shortcuts to record speech and **insert text directly into supported apps**.
- **Added English, Hindi, and Hinglish transcription** with LLM cleanup for fillers, corrections, and lists.
- **Published on Microsoft Store** with Google and OTP login, usage limits, and **local recording history**, using Supabase, Fastify, and SQLite.

WakeOps: Automated Incident Response Platform

- **Built a full-stack incident response platform** using Next.js, Node.js, PostgreSQL, and Prisma that converts Grafana alerts into **tracked incidents with service and on-call context**.
- **Orchestrated automated incident calls** using Temporal and Twilio, with retries for unanswered calls, senior-engineer escalation, acknowledgements, and call history.
- **Decoupled email and Slack notifications** using RabbitMQ, allowing notification channels to run independently without **blocking the call escalation flow**.

WORK EXPERIENCE

Software Engineer **Sep 2025 - May 2026**
Capgemini **Mumbai, Maharashtra (IN)**

- Tracked backend service and database health for a financial services platform, monitoring **CPU, memory, availability, and database load** through production dashboards.
- Analyzed **resource spikes and service degradation** using monitoring metrics, and coordinated with **cloud and database teams** when intervention was required.
- Maintained **production visibility across 20+ services**, enabling faster detection and response to **performance and availability issues**.

Backend Developer **Oct 2024 - Dec 2024**
AdaptSense **Dehradun, Uttarakhand (IN)**

- Developed a **React Native mobile app** using **Gemini APIs** to support **4 input modes** and **4 output formats** for accessibility-focused communication.
- Integrated **10+ input-output conversion combinations** in a single application, reducing the need for separate accessibility tools.

Data Engineer Intern **Jun 2024 - Jul 2024**
HERE Technologies **Remote**

- Developed **Python and Scrapy scripts** to collect retail store location data from multiple websites, handling different **HTML structures and page layouts**.
- Automated recurring data collection using **Scrapy spiders**, reducing **manual data collection effort by ~70%**.

EDUCATION

B.Tech Computer Science and Engineering **Aug 2021 - May 2025**
University Of Petroleum and Energy Studies

Served as **Student Placement Representative (SPR)** for a batch of **100+ students**, coordinating communication with the placement cell and ensuring timely updates during campus recruitment drives.
